Hokkaido University has succeeded in selective metathesis synthesis of  $\text{MgCr}_2\text{S}_4$ .

The study was published in “Materials Horizons”.

Associate Professor Miura group of Hokkaido University has succeeded in selective metathesis synthesis of  $\text{MgCr}_2\text{S}_4$ .

$\text{MgCr}_2\text{S}_4$  is expected to be used in enhance electrochemical performance for Mg-battery and photocatalytic applications.

The research result was published in Materials Horizons.

We, Nagao & Co., Ltd., have been providing “Sodium sulfide (anhydrous)” to their group.

Our product "Na<sub>2</sub>S" was used in this study.
