Osaka Metropolitan University has developed a new synthesis process for mass production of sulfide solid electrolytes.

Prof. Hayashi group at Osaka Metropolitan University has developed a new synthesis process of sulfide solid electrolytes. For details, please read the following report.

“Energy Storage Materials, 67, 2024, 103307”

Our product "Sodium sulfide (anhydrous)" is listed as Na₂S (>99.1%, Nagao) in Section 2, Evaluation of polysulfides.

We, Nagao Company have been providing various high purity sulfides to their group.
